

***Community Development Resource Agency
Health and Human Services-Environmental Health
Placer County Electronic Document Center***
Document Availability

Updated: November 18, 2009

Community Development Resource Agency (Building, Planning and Engineering and Surveying) and HHS Environmental Health is in the process of scanning historic and current land development permit documents.

In general document availability for each Department is as follows:

❖ **Building Department**

- Building permits that have been completed back to the 1940's
- Building plans are NOT available
- Due to quality of the original documents, searching older permits using a full text search may provide unpredictable results
- Many permits (primarily older permits) do not have an address or APN. In these cases a permit number will be needed to be entered to provide results

❖ **Planning Department**

- Currently, all Conditional Use Permits and Variances to the present are available

❖ **Engineering and Surveying Department**

- Engineering and surveying documents (e.g. final maps, improvement plans, grading permits) are not available in the Electronic Document Center

❖ **Environmental Health Division**

- Environmental Health documents associated with wells, onsite sewage disposal and land use projects. Information is available by specific assessor parcel number.
- Currently only a small percentage of the files are available.

If you are unable to find the document you are looking for, please contact the appropriate department at the number below:
